Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Neuberger (4158885) in view of Pederson et al (2002/0105432).

Neuberger shows various arrangements of colored lights and symbols to guide a plane to be refueled. Pederson et al teaches that LED lights can be used in many ways to create displays of color, symbols, words, numbers to be used to inform and guide the operators of vehicles (including airplanes). It would have been obvious to one having ordinary skill in the art at the time the invention was made to use LED displays in Neuberger as taught by Pederson et al since it can be more informative and communicative.

1. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
